NOW... NOTHING STANDS IN YOUR WAY!

“TRACKS MAKE THE DIFFERENCE!”

LOOK INSIDE to see how to...
- Get more Done, Faster & Easier!
- SAVE MONEY doing it all yourself!
- MAKE MONEY in your own earthmoving business!
Dear Friend,

Congratulations! You’ve discovered the most practical & hardest-working tool a HOMEOWNER or LIGHT COMMERCIAL CONTRACTOR can own!

A Struck Crawler is a wonderful time-saver and work-saver—a “bulletproof,” all-track powerhouse that gives you low cost “crawler power” to do all the big jobs around your home, farm, cottage, or light construction site. It’s much more versatile and rugged than any rubber-tired compact tractor and FAR more affordable than any other vehicle with tracks.

It’s a TREMENDOUS VALUE that does 1,001 tough jobs. It’s a rugged workhorse with dozens of attachments & accessories, each capable of doing dozens of man-killing jobs. Owning a Struck Crawler lets you do a LOT more work in less time - and with a minimum of effort. Hard work becomes easy...even FUN!

This brochure is full of information about what makes a Struck Crawler a better choice than wheeled vehicles, and all of the amazing things you can accomplish with dozer power! But first let me take just a minute to tell you about who we are and how we came to be.

From Simple Beginnings to Industry Leading

While I was an engineering student many years ago I had a unique idea...small bulldozers for the do-it-yourselfers. That idea has now seen over 46 years of constant production & improvement. There have been many models over those 46 years, but I think you’ll find the compact crawlers we manufacture today are without a doubt better built, and better designed than anything we have ever done.

Our NEW MH8000 boasts the most horsepower we have ever produced coupled with a sophisticated framing system that is precisely and efficiently robotically welded. Utilizing this same framing system and a “No-Frills, Just Power” design the MH4800 provides unstoppable track power at an unbeatable price. Finally our rugged attachments are perfectly matched to your excavating and land clearing needs. So if you need the power and durability of a steel track crawler, the complete line of Struck Crawlers has a solution for you!

Thank YOU for requesting this FREE INFORMATION! You’re about to learn how the amazing Struck Crawlers help you...

- Be your own boss!
- Do 1,001 "impossible" jobs!
- Work faster & easier!
- SAVE money, MAKE money!
- Be far more self-sufficient!

Thank YOU for requesting this FREE INFORMATION! You’re about to learn how the amazing Struck Crawlers help you...

- Be your own boss!
- Do 1,001 "impossible" jobs!
- Work faster & easier!
- SAVE money, MAKE money!
- Be far more self-sufficient!
New Technology Improves Quality, Reduces Price!

“Make it better.” This simple concept has been the key to our success for over four decades. This attitude applies to every aspect of production...all the way from cutting metal to painting parts. Utilizing Computer Aided Drafting (CAD), robotic welding, automated punching, and now abrasive waterjet technologies we can design, fabricate, and finish new designs quickly and efficiently. This means more savings passed on to you! More importantly these advances make a better product that I am proud to put my name on.

Built in America...backed with 100% integrity

I designed all of the Struck Crawlers. It’s not a cheap foreign import, and we build it ourselves right here in Cedarburg, Wisconsin. We do business in the millions of dollars, but we’re no mass-producer by a long shot. We employ a trusty crew made up of individuals who have been with us an average of 11 years. Our small, hard-working company builds every Struck Crawler with care, pride and personal attention that’s getting nearly impossible to find these days. We are committed to providing exceptional Quality, Service, and Value in every part of our business!

We’re here to help you!

We have been selling our crawlers factory direct for over four decades. This has ensured no middleman markup or hassles, and has kept us close to our customers and their needs. We have learned a lot about what our equipment, as well as others, are capable of doing. So if you have some tough projects in mind give us a call, and we’ll help you decide which Struck Crawler and attachments would be right for your earthmoving needs.

NOW is the time to act: get a FREE QUOTE or PLACE YOUR ORDER now!

The Limited-Time Sale Offer Deadline is approaching. Now’s the time to act. You can’t go wrong -- I won’t let you! Call 1-262-377-3300 today!

YOU’RE JUST A CLICK AWAY!

E-mail us at: info@StruckCorp.com with any questions you may have. Don’t let another season of earthmoving opportunities pass you by!

Now let’s get out there and move some dirt!

Sincerely,

Charles “Charlie” Struck, President
C.F. Struck Corporation

P.S. You can VASTLY increase your self-sufficiency...even BE YOUR OWN BOSS with a Struck Crawler, taking control of big jobs...saving money & EARNING money...enough to pay for the machine!

P.P.S. There’s a SPECIAL SAVINGS OFFER in effect, and the Deadline is near! See the enclosed, bright yellow Sale Flyer...then TAKE ACTION: request a quote, or place your order NOW!

Tracks have more surface area contacting the ground than wheels. A compact wheel tractor contacts the ground on less than 260 sq. in. The Magnatrac puts over 770 sq. in. on the ground! That means you keep pushing when they start spinning. There is even enough power & traction to drive a 48 in. loader bucket into the ground!

Tracks have better flotation. All that surface contact means less pressure on the ground. Tracks' big surface area “floats” on top of mud, sand, snow and other difficult surfaces, while wheels sink in and spin, digging themselves into a hole.

Track vehicles turn 360° in HALF the space. Because you can rotate our tracks in opposite directions at the same time, Struck Crawlers turn in their own length, just over 6’. A comparably-powered compact tractor requires more than twice the space -- over 13’ of clear space to turn around!

Slope Stability! A steel track crawler's tracks and undercarriage provide a heavy anchor down low. Wheeled vehicles carry their weight up high on tires, which are essentially bags of air. The crawlers lower center of gravity lets you get the job done safely on slope conditions far too dangerous for most wheeled vehicles.

Tracks are BULLETPROOF! Rubber tires are easily cut, bruised, punctured, and go flat in storage. Even rubber tracks take a beating in sharp rocks and debris. Our ALL-STEEL TRACKS are 100% blow-out proof. They're impervious to just about anything: sharp rocks, glass, scrap steel, nails, hot materials, weight...even TIME! So you can clear brush or worksite with no worries of unseen objects damaging tires.
**DIFFERENCE!**

All-steel tracks are the heart and soul of every Struck Crawler. Since its development in 1976 Struck crawlers have utilized our unique **Tandem Chain Path (TCP)** System. This custom system dramatically improves track stability by simultaneously engaging matched pairs of drive sprockets and chains on each track. Not only does this provided redundancy in the event of debris in the track system, but also provides track stability equivalent to a sprocket over seven times the width.

Wheels on cars make sense...they go fast on smooth pavement. Wheels on lawnmowers make sense...they don’t mar finished lawn surfaces. But when you’ve got **BIG, TOUGH** jobs to do, **TRACKS beat WHEELS** every time!

---

**TANDEM CHAIN PATH™**

...unparalleled track performance!

The Tandem Chain Path™ (TCP) track system is both efficient and economical to manufacture.

Utilizing rugged yet inexpensive & readily available agricultural chain rather than expensive custom chain provides an immediate means of reducing cost to the end user. While multiple parallel chains are often found in other applications, they are oriented immediately adjacent to each other. The key to the TCP's track stability is the separation of the parallel chains across a distance that is rigidly fixed. This provides lateral support 7X greater than an equal sized single sprocket.

---

**Track Drive and Guidance**

The drive behind TCP is the matched sprockets of the rear drive and front idler sprocket. Simultaneously engaging both track chains provides redundancy in case of debris interference and the effectiveness of a sprocket width seven times greater.

Track guide rollers encase the track chain and precisely direct the chain into the drive and idler sprockets. Serving as weight bearing points, guide roller flanges are cut from incredibly hard AR400 Plate steel.

---

**Track Chain**

The MH Series Heavy Track utilizes #551X chain with 20,000 lbs of tensile strength. This Chain, with its almost indestructible hardness, provides a hardened runway for the Magnatrac’s hardened guide rollers. This standard of quality in a track chain makes it the popular choice of most light commercial contractors and homeowners who put punishing long hours on their tractors.

---

**Track Plates**

1/4" Steel plates are accurately die punched and then positioned on precisely made “tool steel” welding fixtures. These track plates are then robotically welded to the selected track chain. This precise locating and welding ensure the proper spacing for the TCP track drive sprockets.

---

**Track Shoes**

The TS040 Grouser shoe (right) is the classic track shoe option providing exceptional traction & durability in any digging situation. The TS045P Non-Marking Shoe option (left) provides a track shoe capable of withstanding coarse debris while not marking or scuffing finished asphalt or concrete.

---

**Track Tension**

Critical to a stable track system is proper tensioning. While pneumatic and hydraulic tensioning systems can fail, the TCP mechanical tensioning system is rock solid.

With simple bolt adjustments hardened springs provide consistent forward pressure on the front idler sprocket to continually engage the track chains.
BLAST THROUGH JOBS... QUICKLY & EASILY!

Now... enjoy FULL INDEPENDENCE because you do all those tough jobs YOURSELF!

Nothing stands in your way, because your Magnatrac digs, hauls, and moves everything in your path. Equipped with a Loader and a Backhoe -- our most popular attachment combination -- your Magnatrac can handle just about anything!

You’ll break-out loads with a FULL TON of power, easily filling its bucket and toting almost 6 cu. ft., over 800 lbs. You’ll raise loads as high as 7-1/2’, enabling you to reach and dump precisely into a truck box. Crisp, responsive hydro controls give you clean “knock-out” and the agility to grade smoothly and backpull with ease.

Compatible* with dozens of third-party attachments!

- Snow Blower
- Stump Grinder
- Trencher
- Rock Hammer
- Pallet Forks
- Ground Leveler
- Grapples
- Mowers
- Dozer Blades
- Sweepers
- Post Drivers
- Cement Mixers
- Augers
- Tree Spade
- and many more!

* Consult manufacturer for specifications and equipment requirements. Additional accessories may be required.

Universal Mounting System provides access to dozens of attachment options!

The SH44 Speed Hitch has taken our Magnatrac MH Series Crawlers to a new level of versatility. Whether you need a ground leveler, a snow blower, a sweeper, a trencher, or dozens of others, our SH44 Speed Hitch offers universal compatibility with dozens of third-party skid steer attachments (some of which you may already own).

Change attachments as easy as 1-2-3

1. Drive In
2. Pick Up
3. Lock

The SH44 Speed Hitch offers universal compatibility with dozens of third-party attachments, making it easy to switch between tasks without the need for additional equipment. Whether you need to clear snow, dig trenches, or move debris, the Magnatrac is designed to handle it all efficiently and effectively.
Now... enjoy FULL INDEPENDENCE do all those tough jobs YOURSELF!

The D108 model Backhoe stretches out over 11’ and digs up to 8’ deep. Oversized hydraulic cylinders deliver 3,000 lbs. of cutting and breakaway force! Dig quickly, dump nimbly into compact dump trucks.

In a massive display of raw power, we lifted this 700 lb. log from one end. We’d never suggest you lift from one end because of the extraordinary torque and strain...yet the Magnatrac handled it easily.

Through the principle of weight transfer, Struck Crawlers use the weight of the load it’s lifting to increase its traction for more pulling power! Pull ground-engaging plow attachments, plus huge loads of logs, stone and more. You can even move a small building to a new site!

Now, wherever you’d have hired a plow, dozer, or a backhoe, you can do it all yourself with a Magnatrac. It’s tremendously satisfying to know you can handle just about anything -- quickly, easily, the way YOU want it -- thanks to your Struck Crawler!

Profit from the land you already own by harvesting valuable logs!

Equipped with a Category #1 three point hitch & live PTO, your MH Series Magnatrac can take on dozens of available attachments.

Create recreational trails for walking, hunting, ATVs, or horseback riding.

Build a road that drains right, clear brush, and landscape your property like a pro!

Through the principle of weight transfer, Struck Crawlers use the weight of the load it’s lifting to increase its traction for more pulling power! Pull ground-engaging plow attachments, plus huge loads of logs, stone and more. You can even move a small building to a new site!

Just how rugged is a Struck Crawler?

Equipped with a Category #1 three point hitch & live PTO, your MH Series Magnatrac can take on dozens of available attachments.

Create recreational trails for walking, hunting, ATVs, or horseback riding.

Build a road that drains right, clear brush, and landscape your property like a pro!

Through the principle of weight transfer, Struck Crawlers use the weight of the load it’s lifting to increase its traction for more pulling power! Pull ground-engaging plow attachments, plus huge loads of logs, stone and more. You can even move a small building to a new site!
What’s on your land?

Take another look at the land around you... a Magnatrac makes anything possible!

So often we overlook the possibilities of our own land because we don’t have the tools to transform it. Look at the land through the eyes of a Magnatrac and you’ll realize a whole new world of possibilities! Whether it’s your own property or one for sale, make a list of what’s wrong and you’ll find the Magnatrac is a solution.

Poor drainage...cut drainage ditches and re-grade!
No room for recreation...clear land and cut trails!
Unsightly old sheds...demolish them!
Ponds and streams overgrown...reclaim them!
No storage space...dig a foundation for a barn!
Poor access...cut and maintain roads!
No power or water...run utility lines!

The Magnatrac has unlimited potential to vastly increase the value of your land!

No job is too tough!

- Backhoe like a pro!
- Load gravel
- Cultivate your garden
- Transplant trees
- Clean up shorelines
- Pull a 2-bottom plow
- Be a rugged Loader
- Clean out barns
- Disk and harrow
- Build a road
- Install septic systems
- Clear land
- Grade roads
- Lay pipe and cable
- Clear a beautiful view
- Landscape properties
- Dig irrigation ditches
- Clean a barnyard
- Plow deep snow
- Demolish old buildings
- Remove fallen trees
- Dig stumps out
- Fill in ravines
- Install culverts
- Remove big boulders
- Haul fence posts
- Clean roadside ditches
- Dig a pond
- Bore holes for posts
- Build a dam
- Dig a swimming pool
- Split firewood
- Pull a hay wagon
- Dig a home foundation
- Roto-bill your garden
- Build a forest lane
- Lift heavy weights
- Mow fields
- Make firebreaks
- Bulldoze tough ground
- Un-stick your car
- Plow new ground
- Backfill foundations
- And much, much, much more!
YOU'RE THE BOSS
...when you own a Struck Crawler!

SAVE MONEY!
You’re in control of your property with full power and performance at your fingertips. You save hundreds each year when you plow your own snow...haul your own firewood...build your own road... landscape your own property...and handle every tough task for a LIFETIME!

MAKE MONEY!
You’re in charge of your EARNINGS and can make your Struck Crawler pay for itself with a crawler business of your own! It’s easy -- many owners have done it. It’s easy to get work and make a handsome profit.

Pick up landscaping, excavating, and earthmoving jobs. Just ask at job sites, or place a small newspaper ad. Word-of-mouth works, too!

Exceeding Expectations!
"There aren't many bargains in this world but your Magnatrac is decidedly one. It's performance and ruggedness has immeasurably exceeded my expectations."
-- R. Chandler

He had the right tool to get the job done!
"I moved a boulder the size of a pickup bed when others were looking for a jackhammer. An oak log 20 ft X 24 in while others were looking for a chainsaw."
-- T. Light

Both a good investment, and rewarding work!
"...the money I save having paid someone to do it, the Magnatrac has become one of my most precious investments. Not only the savings, but the enjoyment of doing it yourself is very rewarding."
-- F. Canseco

He pulled a 3/4 ton Ford truck and trailer...load and all!
"We got stuck with a 3/4 ton Ford truck with a 14' trailer loaded with 4,000 lbs. I hooked on with the Magnatrac, and pulled it out going uphill. Never thought that little 'Trac would have so much power!"
-- Alan Roquet

Don’t take our word for it!
Sure, we have a lot of faith in the ability of our crawlers, but so do our owners! Throughout this brochure you will notice customer comments about their experiences with our company, and our products. No advertising catch phrase or logo could match the impact of their opinions. So if you want to hear it straight from the horse’s mouth just ask us for an owner in your area, and they’ll tell it to you straight!

"Both a good investment, and rewarding work!"
-- T. Light

"He had the right tool to get the job done!"

Exceeding Expectations!
"There aren’t many bargains in this world but your Magnatrac is decidedly one. It’s performance and ruggedness has immeasurably exceeded my expectations."
-- R. Chandler

Your Struck Crawler Pays For Itself!

"Yes, it was a lot of money. But what I will save building my house myself will pay for the Magnatrac."
-- Randy Schmidt, Michigan

"It appears expensive until you check out other systems. Then it appears inexpensive."
-- Maynard Dalton, Alabama

"The Magnatrac is worth every dollar. It’s more than I expected, built very well, and has awesome power to push huge loads of dirt."
-- Albert Arouri, Connecticut

"My Magnatrac is a very good investment. I’d buy it again, and I’ve told all who will listen!"
-- Sonny Nelson, Virginia

The Magnatrac’s MH Series heavy-duty undercarriage provides a tough-as-nails backbone for the Tandem Chain Path (TCP) track system and our complete line of heavy-duty attachments. Whether you choose the top-of-the-line MH8000 or the economy-minded MH4800 you can rest easy knowing your Magnatrac is built on a rock solid foundation. A rugged undercarriage and track system are just the beginning for the Magnatrac MH Series crawlers. We’ve partnered with two of the best engine manufacturers in the industry; Kohler® and Briggs and Stratton®.

**Two Powerful Engine Options**

The 25 HP Kohler Command air-cooled gasoline engine provides smooth running power to the MH4800’s hydraulic drive train. With almost 40 ft. lbs. of engine torque the MH4800 has impressive performance without breaking the bank.

The ENG35 Upgrade, features the Briggs and Stratton® Commercial 35 HP Big Block V-Twin air-cooled gasoline engine. It provides the MH8000 with more horsepower than any previous Struck Crawler. The engine boasts full pressure lubrication, cast iron cylinder sleeves, a commercial grade starter, 20 amps of power, and a 5” Donaldson® centrifugal multi-stage air cleaner. That’s no lawn mower engine, that’s heavy-duty power that is built to last!

- Solid steel track plates are made from 1/4” steel plate. Thoroughly welded to industrially-rated dual track chains.

- The upper frame of the MH Series Magnatrac is secured to the undercarriage using ten hardened 1/2” Spin-lock® bolt fasteners.

- Dual spring track tensioners are easy to adjust, keeping the track tension even for top efficiency.

- The heavy-duty disc brake system is the only thing guaranteed to stop a Magnatrac.

- Heavy 2 inch steel bars & 1/4” plate steel webbing connect the undercarriage components.

- Grouser shoes provide unstoppable traction in even the harshest conditions. (Non-marking shoes optional)

**Displacement**

- 40 cu. in. (655 cc)
- 54.6 cu. in. (895 cc)

**Horsepower**

- 35 HP (gross) @ 3600 RPM
- 25 HP (gross) @ 3600 RPM

**Torque**

- 48 ft-lbs
- 39.5 ft-lbs

**Air Cleaner**

- paper
- 5” Centrifugal multi-stage

**Alternator**

- 20 Amp @ 3600 RPM
- 15 Amp @ 3600 RPM

**Lubrication**

- Full Pressure w/ filter
- Full Pressure w/ filter

**Weight**

- 122 lbs.
- 95 lbs.
A completed undercarriage (as shown) accounts for 1065 lbs (58%) of a MH8000 within 12 inches of the ground. This low center of gravity means unbeatable slope stability.

Tracks are powered by industrial grade hydraulic motors running at up to 3000 psi. Independently controlled track motors allow an MH Series Magnatrac to turn within its own length.

The hydraulic drive-train is coupled to industrial grade #60R and #80HK chains. This double reduction drive system produces power to the tracks of almost 3 tons! [MH8000 only]

MS32 Mud Scrapers (optional) utilize heavy 1” solid steel bars to clean between track sprockets and extend overall track life.

Rugged axles are precision rolled from high tensile steel, and include submerged grease fittings for easy lubrication.

Track guide rollers are cut from super-hard AR400 plate steel and keep the tracks running smoothly in line for dependable track stability.

---

"This is a well-built machine!

"This is a well-built machine...I'm surprised at how durable it has been. I've kept track of all maintenance and watch for excessive wear, but all components show little wear and tear."

-- Clyde H. Benner, Jr., North Carolina

---

**USING THE RIGHT TOOLS FOR THE JOB**

In order to build any quality product you must have the right tool for the job. In this day and age that also means the right technology. Here at Struck Corp. we are utilizing modern equipment from some of the top names in the industry - Autodesk® CAD software, Fanuc® robotics, Lincoln Electric® welding technologies, and Flow® Abrasive Waterjet cutting system, just to name a few. Our commitment to new designs and technologies ensures Struck Crawlers are getting better everyday!
Handle dozens of jobs all over your property!

No matter what jobs you tackle, there’s a tough Magnatrac attachment to help you get ‘em done faster, easier, and more professionally. We offer dozens of attachments and accessories! All are designed for high performance. And all are a perfect match for the Magnatrac in size, scale, and function.

Loader Digs, Hauls & Dumps a BIG load!

You’ll lift a big payload -- almost 6 cu. ft., over 800 lbs. -- as high as 7-1/2’ overhead. Precise hydraulic controls enable you to lift, pivot, dump, and “knock out” the last little bit into compact dump trucks.

This versatile attachment cleans barns, digs ditches, scoops out foundations, hauls feed, totes fence posts, fertilizer, or hay...or just about anything else! With the Material Bucket you’ll have over 9 cu. ft. of capacity to handle those bulky materials such as loose dirt, gravel, and snow.

Dozer Blade moves mountains... a boulder at a time!

Move rocks, soil, gravel, snow...even big boulders with our hydraulic 6-Way Blade. Excellent for grading roads, lawn areas, removing snow, cleaning barnyards, and much more. Six Way, all HYDRAULIC fingertip control!

Backhoe has a l-o-n-g reach and lots of power!

The Magnatrac becomes a compact, powerful, hard-working backhoe that’s ideal for hard work in tight quarters ordinary machines can’t reach. You’ll dredge, dig basements, footings, trenches for cable and utility lines, pipes and more.

“Wobble control” levers let you reach, dig, lift, swing, and dump with single hand positions.

Dual-bar linkage enables extreme bucket extension and “curl” for maximum breakout, full bites, minimum spill, and compact transport. Choose from 3 bucket sizes, 8”, 16”, and 24” wide.

Wide-reach stabilizers.

Reinforced “box” construction of boom and dipper for strength.

Grease fittings/renewable sleeve bearings at all pivots.
Many more upgrades, kits & attachments available!

- Grouser track shoe kit
- Roll-over protective structure (ROPS)
- Multiple-tooth rippers
- 2-bottom plows, disks, harrows, cultivators
- 3-point hitch & power take off
- Front & rear-mount blades
- Rear-mounted rakes
- Log splitters
- Backhoe-mounted log forks
- More! Call for details.

Most popular package: MH Series Magnatrac with Loader & Backhoe.
Second most popular package: MH Series Magnatrac with 6-Way Dozer Blade and Cat.1 Three Point Hitch & Ripper

Extra-versatile Dozer set-up!

Substitute the MDB154 Hydraulic Angling Blade & CK29 Cylinder for the loader’s bucket, and you’ll have a whole new range off grading versatility. Push straight ahead, angle the blade left or right...or tilt the blade when it’s in the angled position for ditching and terracing. Whether your plowing snow or grading a road you’ll have fingertip control!

Speed Hitch accepts dozens of skid-steer attachments!

Adding a Speed Hitch to the loader opens a new realm of versatility. Need a specialty attachment for a job..rent it. The Speed Hitch is compatible with dozens of third-party skid steer attachments for anything your job requires (snow blowers, trenchers, mowers, stump grinders, and more).

Power Grapple let’s you easily handle logs, brush, and rocks!

Four 1/2” thick steel tines grab onto brush piles and logs with over 1,000 pounds of clamping force. Use the Grapple to position logs and boulders exactly where you want them! Clear your worksite of construction debris or your land of brush piles without even breaking a sweat!

Scarifier/Ripper cuts roots, breaks soil up to 10” deep.

The Magnatrac plunges the 5 ripper teeth fully into the soil with impressive power. Teeth are moveable and interchangeable on the heavy-duty frame, so you can create a variety of ripping patterns.

See Price List for details on all Attachments.

“He built $20,000 stone walls using the Backhoe and Loader!”

“I’ve built $20,000 worth of stone walls with my Magnatrac. I used the Loader and Backhoe attachments to lift and set 80 tons of stone in place in a wall 6’ 4” tall and 160’ long. Some stones weighed 700 lbs. apiece!”

-- David Richards, Pennsylvania
SEEING IS BELIEVING!

Don’t just take our word for it...see what Struck owners think about our equipment! Even better, see for yourself what our customers have accomplished with the unstoppable track power of their Struck Crawler!

“The Struck cat is the best buy ever. Quality is great and factory support is second to none. Tracks and hydrostatic drive gives you endless opportunities. Keep up the good work.”

--- A. Roquet

“Best tool I ever bought, great machine, great support.”

--- J. Edwards

“My nephew was trying to push out a couple of pine stumps. His tractor is twice as big as the MH7000 but it wouldn’t push them out... I took the MH7000 over there and pushed the rest of them out and leveled the ground up in less than 15 minutes. He ate crow that day!”

--- L. Heavner

“A perfect fit all around. Every time I fire up the crawler I’m glad I bought it for the price I paid. Excellent value.”

--- S. Dickey

“Customer support and parts supply is excellent—one of the best features of your company.”

--- B. Goding
Don’t just take our word for it... see what Struck owners think about our equipment! Even better, see for yourself what our customers have accomplished with the unstoppable track power of their Struck Crawler!

**Magnatrac vs Septic Tank**

“I can run it where rubber tires would quickly go flat. Amazing traction and a powerful drive to match. Strong loader and amazingly strong backhoe.”

--- A. Valencia

“I did more than I ever expected it to do!”

--- J. Young Jr.

“I feel like a part of the family because when ever I call we know each other by name... it’s a personal touch.

I’ve used my Magnatrac to remove 70 trees averaging 20” in diameter and 30’ long, dig and pull stumps, removed thick brier under brush, and moved a lot of small trees and bushes, redone several driveways, made ATV pathway through a forest, regrading yards, moved a couple stuck vehicles.”

--- P. Cox
We often get letters and photos from Magnatrac Owners. Here’s how “homesteader” Steve Baker from Limestone, Michigan developed his lot, built his own home, workshop and barn...just Steve and his Magnatrac!

“Dear Magnatrac...

I just thought I’d drop you folks at Magnatrac a letter to let you know how my Magnatrac has been performing. The first project I tackled was to excavate my future home’s basement. The photos show before, during and after on my wooded property. The excavation was 56’ x 36’ x 6’ deep, or about 12,000 cubic feet of earth moved with the tractor! As you can see, the ground is a combination of sand, gravel and rock.

I also excavated the footings for my garage and barn. Several people who visited my property were impressed with the amount of work the Magnatrac could perform.

Please continue your fine service. Continued success for your company!”

Sincerely,

Stephen R. Baker
Limestone, MI
